

Instructions to fill out the “Bracket Sheet”

Please use the enclosed sheet with Player #'s to help “seed” players for the “Bracket Sheet”. Prior to the tournament, cut out the numbers off of the enclosed sheet. When you have closed registration and know your total # of players, place that amount of numbers into a container (hat, bucket, etc) and have all players draw a #. This is their player #. **You cannot allow late players to enter after you have filled out the “Bracket Sheet”.**

Find your total # of players on the list below and then follow the directions carefully to fill out your “Bracket Sheet” correctly.

63 Players - Player #1 starts in Round 2 (fill in first), Player's #2-63 start in Round 1, in spot #'s 3-64
64 Players – Start all players in Round 1

65 or more Players only – You will need to have a certain number of “play-in” games to get into Round 1. For example, if you have 65 players, #'s 64 and 65 would have a “play-in” game in order to get into Round 1. #'s 1-63 would simply be placed in Round 1 and the winner of #64 and #65 would take the final spot.

Here is a formula to quickly determine how many “play-in” games you will need to have;
Fill in the first blank below with your total # of players (**65 or more players ONLY**)

____ (total # of players) MINUS 64 = ____ (# of “play-in” games) TIMES 2 = ____ (z)

The final # (z) you get will be the total # of players involved in the “play-in” games.

Pair off players #1 – z for “play-in” games and fill out the rest of Round 1 with the remaining players. This sounds complicated, but simply follow the directions and it will work out correctly.

EXAMPLE with more than 65 players

75 TOTAL PLAYERS

75 (total # of players) MINUS 64 = 11 (# of “play-in” games) TIMES 2 = 22 (z)

#’s 1-22 will pair off for “play-in” games while #’s 23-75 will fill in the rest of Round 1.
